Upcoming Masters

Everything is balancing at for some giant release, Sedona Arizona beach recall of what's more powerful, 1,000,000 meditating for world Peace (Havabat a billion) or a billion (millions as of past xyz years) forcefully discharged?

In easier terms, this is saying each exchange is love compounded until it's resonated to silence. Everything that works with Natural Law will compound in loving harmony while every unfavorable discharge is a messenger of balance, such as xyz proposed poets such as Oscar Wilde, and even Oscar Wilde suggests, people truly reflect distate when they have favored true distate over truth.

Theres a reason it's a climb to heavens door & a highway to hell ooo (stairway) (freeway) it's easier to commit evil as hell is symbolic of then to build a heaven that would common sensely & Through Knowledge & experience of through communion w/ Nature, be open to All, as foolishly as Christian dom has religious zeal has tried to force it's treasures upon cultures it deems as Trash that, with has preserved ~~culture~~ evidently not

in music, Nature, books, Art, & by seeking beauty that accepts & not one that collects & dictates beauty. beauty has come only at the cost of the need for more beauty as is evident in Dionysian & Apollonian Arts as Nietschze mentions.

what is evident in my studies is the need for equib-scy-cling art that produces holistic equilibrium & cycles alongside Nature.

what I've learned/recognized 10-11 pages in is Faith in Science is singular, but in practice is, as effect is, infinite in degrees.

Man is being "taught" to see his emotions & God as seperate & thus the 2 things that, apart from our physiological build make us human, are keeping us in a belief bubble in which we await the savior of our belief to command us to agree as if we weren't put here to do exactly that, by use of Will, That choice is as free as we knew it to be through self Gnosis.

I recently viewed the notion that if you are unable to practice what/ how you want then take the time to practice another virtue. (somewhere on social media TBD)

Heres why I share an affinity with so:

The 100 day challenge - by no original means - was a simple request to & fro' yo. Give to yourself & fellow 'Man a glimpse into both my & our worlds. Inspiration at it's finest. While I am still deciding how to judge this self made situation my current pivot is to post what I have and at a rate of 1-2 a day else all at once or maybe 3-4 a day. When I took a ~yearish off social media it was largely to return with my own content. I haven't fully committed to so-evident to (m)any of you?! - yet I don't fully regret coming back, especially having a flip phone, limited data & more ability to sit without needing a to fiddle - though I'd like a fiddle - as much. Less distracting = more interacting.

So. Heres to transparency. Vulnerableness. Excellence.

"India has long been a beacon telling us how to lead a balanced life, away from the *maya* of the past and future. I have been to India a number of times and India has taught me how to be in the *now*. My book tells the reader how to achieve this state in a practical way."

My Suicide Note: I am truely sorry for numerous occasions in which I expressed a betrayal of sexual morality. 1st & foremost allowing my childhood best friends brother to one of (Bowen & Garrett) ← take me in the woods & ~~scratch his [illegible]~~ massage his bum while he masturbated on a mountain dew bottle & his hand to then show me. I hid this from my loved ones because of a desire to be normal, avoid rejection of the circumstances & to "keep the peace." Doing this would guarantee peace was kept from me.

Secondly, for molesting Tyler when Sean Broek & I took our experimentation from the two to the three of us to enhance the pleasure. We coerced him with candy, [illegible] abused his trust in his older brother & friends & invaded his [illegible] privacy & sense of self.

was younger ~~sito~~ family, I wanted my maturity recognized through sexual dominance of my "superiors."

I'm not sorry for investigating my circumcision, protesting it nude, struggling with boundaries, struggling alone nor am I interested in rumor threat or treat. What I've done wrong I yearn to mend. Where I purposely did wrong I will make all effort to right.

So, topic at hand: my suicide. I wish to kill the desire to kill myself. Had I a gun I'd prefer to shoot targets. With access to near unlimited poison, I crave wellness & self discipline. As a thief I'd ~~prefer~~ to [redacted] steal the need for ~~[redacted]~~ theft time from myself and ~~[redacted]~~ FK. As a life trader, I'm interested in trading excuses for experience. As a molester, I need community that is spiritually sound, emotionally intelligent & morally impressive. Let us kill the killing.
